

Connecticut SIM Health Information Technology: Agenda

June 3, 2013 (9:00-11:00a US ET)

Connecticut Valley Hospital, Page Hall, Conference Room 365

- | | |
|---|---------------|
| ▪ Welcome new additions to the work group, discuss goals for today's meeting, review synthesis from first work group meeting and SHIP's vision for care delivery, payment, and HIT innovation | <i>15 min</i> |
| ▪ Share current hypothesis of the care delivery work group: population health model that takes a whole-person centered approach to overcome barriers in the stage of health | <i>15 min</i> |
| ▪ Discuss initial hypothesis for HIT infrastructure design that could support the components of the recommended care model | <i>20 min</i> |
| ▪ Break out to review the capability road map proposed by the initial hypothesis and refine based on CT specific considerations (e.g. existing HIT assets and capabilities) | <i>45 min</i> |
| ▪ Introduce potential levels of standardization that would need to be applied to the infrastructure and capabilities across the different stakeholders | <i>15 min</i> |
| ▪ Align on next steps | <i>10 min</i> |
