

EAC member comment on report v1.3  
Submitted by Dr. Robert Willig  
6/4/15

I reflected on the discussion at our last meeting, spoke with individuals internal to Aetna, and communicated directly with Drs. Bower and Stangler. They were unable to fully participate in the discussion last week. Based on all of this, we've concluded that our organizations will not support section 3.5 in the most recent EAC Phase I report draft. We strongly believe that such a recommendation is a non-consensus recommendation.
