Suggestions for You (details inside)

Ask your doctor about medication to prevent migraines

Ask your doctor about a mammogram

Learn more about these suggestions from Harvard Medical School*

Ask your doctor about medication to prevent migraines. [285]*

Your medical and prescription claims suggest you frequently take medication to treat migraine headaches after they occur. They also suggest you are not taking a medication to prevent migraines before they start. There are medications that may stop migraines before they happen. Call your doctor soon to ask if you should take a medication to prevent migraines.

Ask your doctor about a mammogram. [2130]*

Your medical claims suggest you have not had a mammogram in the past year. Women in your age group (40-70) should have a mammogram every year to look for abnormal breast tissue that may be cancerous. Finding breast cancer early helps make it easier to treat and cure. Call your doctor soon to ask if you should have a mammogram.

Save money by switching from Coumadin. [3564]*

Asking for the generic form of a drug is a good way to pay less for
