

**Department of Mental health & Addiction Services**  
**System Inventory Draft – for discussion 10/27/11**

The DMHAS Data Performance (DDaP) System is a web-based data entry and upload application. DDaP is used to capture and store the Private Non-Profit Provider (PNP) data used for state and federal reporting and PNP performance management.

Avatar is a vendor supported application used by our State Operated Facility providers to manage client admission, transfer and discharge activities. It is also used to collect the information needed for state and federal reporting.
