Subject: Re: My comments of Quality Council Report

Good afternoon,

The Southeast Asian American Health Coalition (Cambodian, Lao and Vietnamese communities) believes that inclusion in the collection of all health data including payer data is as important to the health of our communities as is access to language, diagnostic tests and treatment. The language of this report alludes to the collection of more granular data but provides no specifics on what communities will be included.

We are requesting that this language be changed to include all communities living in Connecticut without regard for their size. While we understand that data analysis may not be possible for all groups in building a foundation for data collection we must assure that no one is excluded.

Many thanks for all your hard work,

Theanvy Kuoch, MA;LPC
